NEW PROJECTS

June 2026

- **Please submit new project requests via the work order system.**
 - Visit the Planning, Design, and Construction web site and fill out a project request form: [Project Request Form | Planning, Design, and Construction](#)
 - It looks just like a normal work request, but choose 'PD&C' under the 'Repair Center' tab.
 - It is important for us to have everyone use the work request system so that we can track our projects and do a better job for you. Thank you!

NEW FURNITURE REQUESTS

- **Please submit a new project request as above & tell us that it is a furniture request.**
 - PD&C staff can make recommendations to you, direct you to furniture resources at the Procurement Service Center, and review your order prior to submitting it to the PSC.
 - Please be aware that selecting and ordering furniture takes a great deal of time – once ordered it is likely that furniture will not be delivered for 8-12 weeks.

HERE IS WHAT'S HAPPENING on CAMPUS PROJECTS

- **Anschutz Engineering Center**
 - Punch list corrections have been substantially completed. Corrections to site and landscaping work are underway. Final building commissioning and documentation of the building LEED status are ongoing.
- **Engineering & Applied Science Building Renovation**
 - Construction is well underway. Most interior demolition of the building for phase 1 is complete and some selective structural demolition is ongoing to allow for new micropiles under the building. The micropiles will help carry structural loads for the new third floor on the east side of the building. Yep, we're getting a third floor.
 - Construction is expected to be completed in 2 phases starting spring term 2026 and run for 2 years.

- **Main Hall Boiler Replacement**
 - The project is complete!
- **Main Hall AHU Controls Upgrade**
 - The controls have been replaced, and the contractor is completing punch list items including adjustments to the control system programming.
- **El Pomar Center / Kraemer Family Library Chiller**
 - The chiller is online and operating. The variable frequency drives (VFDs) are on order and will be installed this summer.
- **El Pomar Center / Kraemer Family Library Controls**
 - The building control system has been programmed for the new chiller and will be modified for the VFDs when they are installed.

- **Meadow Lane and Regent Circle Paving**
 - It was short! It was difficult driving around all those cones! It is complete and it looks great! Thank you all for your patience while the City of Colorado Springs paved the public roads on campus.
- **Gallogly Recreation and Wellness Center – Aquatic Center replastering and painting**
 - Some small deck repairs are in progress, and some lighting controls work is being done. The work should be complete in July.

- **Dining-Renovation Project**
 - Design work is well under way and the first round of pricing received.
 - Construction work will take place over the summer.
 - Work will take place on the hillside between the Clyde's Gastropub patio and the spine.
- **Student Life Refresh**
 - The project includes new paint, graphics, and furniture. New flooring and paint are in place, and the new furniture is scheduled to be installed in July.
